CRYSTAL CLEAR QUALITY SINCE 1979

VETRERIA NUOVA ROMAGNOLA S.R.L. UNIPERSONAL specialises in the design, manufacture, and installation of glass products for the residential (public or private), commercial building, and furniture sectors.

Founded in 1979 as an artisan business, it has evolved over time to become an industry in its own right. With its highly specialised staff and state-of-the-art manufacturing systems, it is able to manufacture high-quality products and install them with good workmanship, in accordance with the regulations.

The company's various divisions fully meet all design and architectural requirements for the creation of new buildings or the renovation of existing ones, as well as for their structural, aesthetic, energy and performance improvement in general, with a very wide range of articles, such as **safety glass; thermal and/or acoustic insulation glass; parapets; staircases; canopies; removable panoramic glass windows (VEPA); partitions for interior spaces; interior and exterior doors; shower cubicles and various furnishing elements** (including stainless steel, iron and wooden components, made to measure in collaboration with expert artisans).

Careful internal quality control, in compliance with the requirements of European standard EN 1279-5, guarantees the certification of the **CE mark**.

FROM DESIGN TO INSTALLATION. Thanks to the work of our production line technicians, our distribution and logistics department and our teams of installers equipped with all the necessary equipment (crane truck; suction unit; electric platforms, etc.) **YOU CAN SEE YOUR DREAMS COME TRUE!**

GLASS PARAPETS FOR INTERIORS AND OUTDOORS

Glass parapets are true furnishing complements that express the desired design concept for one's environment, whether indoors or outdoors, through countless possibilities for customising the glass, the fastening systems and the various accessories (handrails; LEDs, etc.).

Our technicians will draw up a detailed project, guiding you in a conscious choice of the type of railing to be installed, which must guarantee your safety, be in accordance with the intended use, and fully reflect your expectations.
